

Simulations and Drills: Educational Tools

Kaiser Evaluation Form for Drills; Debriefing Tool

Labor and Delivery/Family Centered Care, Mock Obstetrical Hemorrhage

Roles and Responsibilities of Staff Skills Validation

Used with Permission from: Lawrence Lurvey, MD; Kaiser Permanente, West Los Angeles

SHIFT _____

DATE: _____

CRITICAL ELEMENTS	MET	NOT MET	COMMENTS
A. Primary Surgeon, MD or CNMp			
• Recognizes the need to activate the hemorrhage protocol and ensures its immediate activation			
• Updates nursing team and the team leader of blood products needed.			
• Cancels the hemorrhage protocol as indicated			
B. Charge Nurse or designated team Leader			
• Assesses the patient, source of bleeding, color, amount			
• Cont. monitor VS			
• Stays with the patient at all times			
• Performs all nursing interventions			
• Call MD using SBAR format			
• Initiates the hemorrhage protocol per MD order			
• Ensures IV access patent			
• Ensures collection of a Blood Bank specimen and its immediate transport to the blood bank			
• Assigns a person who will communicate with the Blood Bank for the duration (Communicator)			
• Maintains communication with the physician, surgeon or designee, using SBAR			
• Explains all procedures to patient			
• Obtains transfusion consent			
• Arranges transportation to L&D			
• Ensures cancellation of the protocol, as directed per policy and prompt return of unused blood products to the Blood Bank			

CRITICAL ELEMENTS			
C. Designated team leader or staff			
• Calls the Blood Bank stat @ extension [XXXX]			
• Tells the Blood Bank technician “Hemorrhage protocol is in effect for patient (state patient’s name), medical record # (give patient’s MRN), in room # (give patient’s location/unit)			
• Gives telephone extension for return calls and further communication			
• Immediately transports the blood specimen and lab slip directly to the Blood Bank via transporter			
• Initiates electronic or manual orders for all Blood products as they are requested by the attending MD/CNM			
• Relays to the blood bank any information and or instructions from the MD			
D. The communicator (person assigned to communicate with the Blood Bank), usually the Ward Clerk or Transporter			
• Transports blood bank specimen to the Blood Bank immediately if transporter is unavailable			
• Completes orders for blood products (electronic or manual) and <i>Blood Release Verification</i> forms for pick up of products.			
• Receives blood products from the Blood Bank and delivers to patient location immediately if transporter is unavailable			
• Maintains close communication with the Blood Bank			
• Waits for additional instructions from the Charge Nurse or team leader			
• Notify the Blood Bank if hemorrhage Protocol is cancelled by the MD/CNM			
E. The Transporter (if available) will:			
• Bring the blood specimen (a red top Corvac) and the complete release form to the Blood Bank			
• Pick up 4 units O negative (blood type of patient) PRBC or			
• Pick up additional blood products as ordered			

F. The Blood Bank Technologist (CLS):			
• Prepares 4 units of uncrossmatched O negative RBC for immediate issue			
• Completes uncrossmatched Waiver for MD's signature			
• Immediately calls the telephone extension of the unit given for pick-up of the blood product and the waiver			
• Notifies a lab supervisor as needed			
• If requested, begin to thaw at least 2 units of type specific frozen plasma. If ABO/Rh is not known at this time thaw AB plasma			
• Immediately performs type and screen			
• Verifies ABO/Rh result with previous record otherwise have another technologist verify ABO/Rh			
• While antibody screen is incubating, immediately spins crossmatch 4 units of type specific RBC			
• Checks blood inventory and orders, additional blood products for immediate delivery			
• Processes requested blood products as soon as telephone orders received			
• Sets aside the labeled donor unit segments of issued blood products for later recording and/or maintenance			
• Compare pertinent paperwork			
• Standby for additional instructions			
• When protocol is cleared/cancelled: complete paperwork and update patient's computer record			
• Restores unused blood products in the computer and the refrigerator			
G. Scrub Tech/RN:			
• Scrubbed and in OR within 1-2 minutes			
• Sets up equipment in OR/DR			
• Prepares D&C/Hysterectomy tray			
H. Other RN:			
• Assists with patient transfer to OR			
• May be 3 rd nurse to assist anesthesiology or scrub tech prn
