

MCH Needs Assessment (Title V)

2025 Title V Needs Assessment

The Title V program has a maternal child health needs assessment done every five years.

This assessment reviews maternal child health population needs, program capacity needs, partnerships, and collaborations.

We need your help! The needs assessment shapes important program decisions for our next cycle.

Most of our needs assessment activities (and your participation and input!) will occur in 2024.

Needs Assessment Team

- **Katrina Heche**, Title V Director
- **Mary Kusch**, Title V Evaluator and Epidemiologist
- **Julia Norton**, Health Equity Coordinator
- **Kenmikiya Terry**, Maternal & Infant Mortality Prevention Unit Supervisor
- **Mandy Quainoo**, Title V Family Delegate
- **Hannah Schmidt**, Community Partner Specialist
- **Jacqueline Sills-Ware**, Community Partner Specialist
- **Rob Fontella**, Health Education and Outreach Specialist
- **Alicia Hynek**, Perinatal Nurse Consultant
- **Nikki Ripp**, MCH Unit Supervisor
- **Shawn Meyer**, MCH Nurse Consultant
- **Heidi Massey**, Community Health Promotion Specialist

Approach for this Cycle

In this cycle's needs assessment, our priority is to center community voice, including from individual community members and community-based organizations

We will also be assessing and analyzing a variety of data sets, and we will reach out to health systems across the state.

We are intentionally planning our outreach so that we have representative participation and hear from populations who are most impacted by the MCH needs that Title V addresses

Ways to Get Involved

We are early in the planning stages but activities (and your participation!) will begin in 2024.

We will be sending out a follow-up survey where you can tell us your level of interest in helping with needs assessment activities in 2024.

The survey will also ask if you are interested in staying up to date with the process from beginning to end.
