

Wisconsin Perinatal Quality Collaborative

3 Ways to Engage in Quality Improvement

Whether you're exploring a new area of improvement, ready to address an ongoing challenge, or looking to create system-wide change, WisPQC offers QI opportunities designed to meet your team where you are.

	 COMMUNITY OF LEARNING	 SPRINT	 COLLABORATIVE
	An approachable, education-focused path to quality improvement.	A shorter, focused approach to improving a specific area of perinatal care practice.	A comprehensive approach to drive system-wide change in perinatal care practice.
Best for:	Individuals and teams who want to build knowledge, explore improvement, and connect with peers.	Hospital teams with a specific improvement opportunity that want focused support without a long-term commitment.	Hospital teams ready to make broader, system level improvements across multiple areas of care.
Time:	Two sessions per month for 3-6 months	Approx. 3-6 months	Approx. 12-18 months, including a 9-12 month implementation phase
Measures:	Simple pre- and post-assessment of key practices.	A focused set of 1-3 measures tracked regularly to identify progress, shifts, and trends.	A robust set of 3-8 measures tracked over time to understand progress and drive improvement.

Find the QI opportunity that fits your team. Connect with WisPQC to learn more and get involved.
